

# Addressing the Issue

## Humanitarian Data

- \* Unstructured
- \* Unrelated
- \* Heterogeneous
- \* Non-standardized

# Delivering Insight

Open source

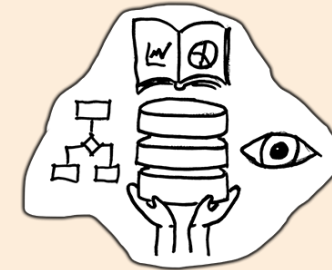

Cloud based

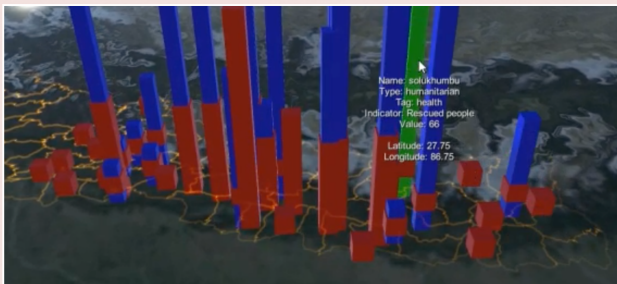

- \* Extraction
- \* Transformation
- \* Topic Recognition
- \* Information Synthesis

Flexible, dynamic platform

# Visualization Tool

- \* Interactive data display
- \* Cohesive visualization
- \* Building-level precision with OpenStreetMaps + esri

- \* Virtual Reality version available

Datasaurus

# Future Development

- \* Provide recommendation for standardized data collection scheme for quick data aggregation
- \* Improve visualization features
- \* Develop into a service platform
- \* Explore database solutions from neuroscience, financial service providers
